

Pride® Lifts

Outlander LP

The **Outlander LP** Exterior Lift Series is comprised of low-profile lifts designed to take your 10" (25.4 cm) or 14" (35.6 cm) mid-wheel drive power wheelchairs with you. Low-profile lifts provide increased visibility while the lift is in use or in the stowed position. The design also provides a shock-absorbing "cradle effect" which protects your power wheelchair while the vehicle is in motion. This is a great exterior lift option for sedans, SUVs, mini-vans, full-size vans and pickup trucks. Simple, hitch-based installation requires little to no modification of your vehicle and allows for easy removal.
